

ENHANCER CROSS-MECHANISM BUILD (237,824 anchors, GM21) — not the OIS training set.

7,185 of 20,515 = 35% of differential-accessibility anchors show no H3K27ac change.

Of the 13,330 co-differential anchors, 12,429 agree in direction = 93.24%.

The OIS trainset's 43.9% figure conditions on H3K27ac instead and is not interchangeable with this.
